

# Accelerate SBA Loan Processing with Robotic Processing Automation

We've teamed up with UiPath, the world's most prominent RPA vendor, to provide an automation solution that can expedite the three steps to processing a loan application with the Small Business Association through the Paycheck Protection Program.

Automation technology can help you deal with the deluge of loan applications, and disburse funds within the 10-day requirement, as well as enhance customer and employee experiences with your loan service.

RPA technology is flexible and scalable. Your bots can adapt as your systems need to respond to changes in SBA rules and processes.

Let's work together to help save America's small businesses with automation.

**SDLC Partners  
+ UiPath Equals  
Reliable Technology  
and Experienced  
Automation  
Implementation  
Experts**

**In just three days, RPA bots can go to work to help you deal with the deluge of SBA loans now and in the next wave.**

## Module 1: Data Extraction

Handling inbound small business applications can be streamlined and manageable.

Module 1 supports each step in the process from application, data extraction, verification, review and verification, and loading into your loan system.

## Module 2: Data Extraction + Eligibility Verification & Underwriting

Module 2 supports the data extraction workflow, as well as eligibility verification and underwriting steps.

## Module 3: Lender Information Preparation & E-Tran Upload

Module 3 enables processing loan guaranty forms for SBA submission, including loading, preparing the PPP lender application forms, application review, and upload via the SBA portal.
