

Operational Efficiency & Automation for Revenue Cycle Management

Our Revenue Cycle Management solutions incorporate process optimization, intelligent automation and RPA technologies, with over 15 years of measurable impact on healthcare operations, finances, and programs.

Smarter Solutions for Frictionless Healthcare

Medical Coding

Streamline highly manual and error prone RCM activities like credit reconciliation, improper coding issues, and claims denials.

Medical Billing

Remove waste from every step in the billing process while lessening the burden on staff.

AR Management

Track a claim more efficiently throughout its life cycle, tightening payment cycles.

Bad Debt & Collections

Address front- and back-end billing and payment issues and errors before they escalate, keeping customers satisfied.

Let's Make your RCM Streamlined, Optimized, and Automated

RCM Analytics

- Dashboard and Metrics Reporting
- AI/ML Engineering and MLOps - Denials Management, Unpaid Claims, Operational efficiency, Claims Reconciliation, Reimbursement Rates etc. with ready to deploy models
- Advisory services around regulatory reporting, HFMA MAP Keys, etc.

RCM Intelligent Automation

- Digitalization of Physical Documents through NLP Engine
- Process Re-engineering and workflow optimization
- Smart Automation for RCM Processes
- Coding & Billing: Chart analysis request, Charge capture, Billing edits

RCM Data Management

- RCM system integration with PHM tools, EMR/EHR, Patient Apps etc.) for Single Source of Truth and Gold Copy
- EDW /Data Lake Implementation & Operations
- Manage clearinghouses & billing databases
- Unstructured Data Processing

RCM Digital Transformation

- Platform Evaluation and Selection
- Product Engineering and Sustainance
- Mobile/web-based patient engagement tools for Appointment Mgmt., Reminders, Charge Capture, Claims Processing, Utilization, etc.
- Human-centered & omni-channel design
